D. The Ministry of Healing

1. The idea:

In reality this is part of the administrative work as the Lord show His authority over the life forces. But it is such a large part with so many ramifications that it seems to need a fuller part in our study. There have always been healers in various societies and there are still such today. But the ministry of the Lord Jesus is a far cry from that of those who often claim to exercise such power. The superiority of His work and the distinction between it and what we witness in our culture by many authorities ought not to be lost.
