h. Final notes by TVT.

This material is not for memorization and you can probably put it in better form. It is given to have a rather concise account of the Lord's life with the material from the Gospels compared. A Gospel harmony is a needed supplement.

There follows a map of Palestine (crude) and likely some other oral remarks on the Lord's life, its significance in theology, and its role as a model for us. We will urge you to study the Gospels as much as possible...to be as familiar with the Lord as opportunity will allow. While we cannot do all of this in this rather full course, we can suggest that you make it part of your work for the total edification and enrichment of ministry.
