

## LESSON # 2: COMING TO GRIPS WITH THE GREEK VERB

### THIS LESSON INCLUDES:

- The nature (character of the verb)
- Properties of the verb
- Expressions of the verb (tenses, mood, and voice)
- Meanings and uses of the tenses
- Further vocabulary

### THE NEXT ASSIGNMENT IS:

- Be certain you have the alphabet, and all materials related to it, firmly in mind, completely understood, etc.
- Spend an hour reading Greek--out loud--with your buddy. You may use the material on page 8 at the conclusion of this lesson.
- Know the names of the Greek tenses, moods and voices and understand basically what is indicated by each.
- You do not need to know the meanings and uses of the tenses but should have this material for reference if needed.
- Add the vocabulary words at the end of the lesson to your vocabulary list. Know them all thoroughly.

And, incidentally, as you read aloud with your "buddy" listen for words that sound like English words. There is about a twenty-five percent correspondence between Greek and English although, I confess, at times you must listen very closely to pick it up.
