

LESSON # 5: PICKING UP ON THE GREEK NOUN AND SOME BASIC TOOLS

THIS LESSON INCLUDES:

- What the noun is and what its properties are
- The definite article
- A practice exercise
- Discussion of the Lexicon
- Notes on the Concordance

So we are combining our energies at this point by continuing our grammar study and beginning to look at some of the tools that may be helpful. You have not been required to buy a lexicon and for the assigned study you can find some in the Library or in the hands of a fellow student who has taken the regular Greek course.

- And some more vocabulary

THE ASSIGNMENT FOR THE NEXT CLASS IS:

- Read carefully the material in this lesson
- Learn the declension of the Greek article
- Read Greek aloud with your "buddy" for at least one hour
- Do the required lexicon assignment
- Memorize the vocabulary

and stay sharp on everything else we have done!

- There is, in this lesson, more Greek that you can use for your reading practice if you wish.
