

SOME GREEK TEXT AIDS

--There are a lot of them but here are some that will be useful to you, particularly if you decide to just add a little Greek to what is done in this course:

Alsop: AN INDEX TO THE BAUER/ARNDT/GINGRICH GREEK LEXICON is potentially a great help. On a verse by verse basis and with a transliterated text, Alsop keys the words of the text to the lexicon for your further study. In other words, with this you can use the larger lexicon even if you cannot reduce forms to their roots...Alsop will tell you how to find things in the lexicon.

Metzger: LEXICAL AIDS FOR STUDENTS OF NEW TESTAMENT GREEK, gives a frequency list of New Testament Words along with keys for word identification and usage. Particularly good section on compounded words.

Greenlee: A CONCISE EXEGETICAL GRAMMAR OF NEW TESTAMENT GREEK is a handy sized volume for ready reference on Greek grammar and syntax notes.

Morrison and Barnes: NEW TESTAMENT WORD LISTS give words in the New Testament with English meanings (chapter by chapter except for the synoptic Gospels). Not exhaustive but helpful if you can quickly refer to the Greek and English and not forget what you have seen.
