General Instructions

This test is formed after a multiple choice pattern with a few deviations. Note that an answer sheet is provided and all answers must be marked on that sheet as indicated in the short directions given at the individual sections.

The form of the test is that of multiple choice in a varied medium but with you still having multiple answers and being able to select the correct one to define a stated position. I have tried to see that there is only one correct answer for each question..but if multiple answers should accidentally occur, they will be honored.

No external helps are permitted (although a dictionary of the English language is allowed) and you should be finished in two hours although some will be finished before that..and a student needing more time may use the entire time allotted for this class (to.7:15).

Be sure not to miss the note on your readings on the answer sheet!

When you are finished, return the entire examination materials to the instructor..securing the answer sheet as the first page of this material..using a paper clip as supplied in the front of the room.

Following this page is the answer sheet..remove it for easier work and then the questions in the respective sections.
