

VIII. LESSON SEVEN: Hebrew Grammatical Features of Interest

Just to keep you posted, we have studied the Hebrew alphabet, Hebrew words, verb and noun principles and have picked up a little vocabulary as we have gone. Much of this is for recognition...I have mentioned all that I think you must know.

In This Class, we will try to:

1. Pick up some points on pronouns
2. Take a squint at the Hebrew prepositions of major importance
3. Get a glimpse of some of the major particles... and anything else that strikes us on the way.

For your Next Assignment:

1. Read Hebrew aloud either from work in the syllabus or from a Hebrew Bible for one hour. Time yourself. You may take a break if needed but put in a good hour being as consistent as you possible can.
2. Return to page 21 and spot at least ten words that have inseparable prepositions. Copy 'em out.. tell what the preposition is. Identify its meaning, that is.
3. Return to the Hebrew on page 11. Read it over and make a list of all the words you can identify as 1) nouns 2) verbs 3) prepositions 4) pronouns. (Items 3 and 4 should be independent prepositions and pronouns, not those that are attached to another word) Spend about 1/2 hour on this.. ..no more..and be ready to turn it and item 2 in for the appraisal of the skilled eye of the teacher.
4. Learn the new vocabulary...and it is always a good idea to review the old.

So we are ready to go to work on the material of this lesson with all the preliminary and periferal things out of the way!
