

Using Some tools...and doing the following assigned work!

1. With the help of a concordance, discover what Hebrew words are translated "hide" "conceal". List these words (be careful not to include any Greek words...one course at a time is enough).
2. Go to the Hebrew lexicon and look these words up and discover what other meanings are given to them besides "hide" or "conceal".
3. The result is that you will have two lists...one from the concordance listing the words and one from the dictionary giving the other shades of meaning. You may do this on this page or on an added sheet if you wish.
4. The purpose of the assignment is to give you a bit of practice in the use of the concordance and lexicon and also just to add a touch of interest in the wide varieties of translation possibilities that occur in our study.
